

SAFETY MESSAGE FOR BOATERS

Mayflower Wind is developing a federal offshore lease area, located over 30 miles south of Martha's Vineyard and 20 miles south of Nantucket, that has the potential to generate 2,000 megawatts (MW) of low-cost clean energy. We expect to deliver clean energy from the project by the mid-2020s.

Geophysical and geotechnical surveys provide critical data about the seafloor and subsea for evaluation in the project design and permitting process. Multiple vessels will conduct surveys in Mount Hope Bay, Sakonnet River, and Rhode Island Sound.

WHEN BOATING IN THE AREA:

The vessel *GO Liberty* and *Westerly* are using towed equipment in Mount Hope Bay, the Sakonnet River, and Rhode Island Sound. The maneuverability of the *GO Liberty* and *Westerly* are significantly restricted.

It is important to maintain a safe distance of at least **1 kilometer (0.5nm)** from the *GO Liberty* and **500m (0.25nm)** from the *Westerly*.

GO LIBERTY

LOA: 170'

Call Sign: WDK6648
